DETAILED ACTION

1. The amendment of 12/11/03 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

For the reasons stated below and for the reasons stated in the prior Office Action in paragraph 1, Paper No. 10, the rejection of claims 1 and 2 under 35 U.S.C. 103(a) in Paper No. 10 is upheld.

Response to Arguments

3. Applicant's arguments filed 12/11/03 have been fully considered but they are not persuasive. The amending of claim 1 to include the formula $\Delta L = L\alpha(t-t_0)$ does not render the claim allowable over the combination of prior art because it is a basic formula for the heat expansion of a material and is implicit in any claim which includes "determining an expected expansion" (line 7) of a material that is heated.

Regarding Applicant's remarks on the Mikkelson reference in the penultimate paragraph of Applicant's Remarks, Mikkelson teaches the cutting of a hot plastic lenticular sheet material allowing for material shrinkage (col. 6, lines 4-8). The

Mikkelson reference is combined by Examiner with the British reference 1,074,662 and Nishigaito. British reference 1,074,662 implies calculation of the rate of thermal expansion of a plastic sheet (claim 3) and Nishigaito explicitly teaches compensating the length of division of a heated material using a thermal expansion coefficient (translated abstract), which would be accomplished by one of ordinary skill in the art using none other than the above equation.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
